

The United States in Japan

Sase Hirona & Haneda Eri

We went to Misawa base to exchange with Edgren high school students.

We went there for the first time.

We saw many buildings from a bus.

The form of them is similar to avoid attacks from enemies.

When we arrived at Edgren High School, we noticed a difference in smell.

Besides it is different from our school.

For example, there are green lockers in the corridor. It was cool.

Also there is American national flag in the classroom.

Also there is a gap at the bottom of the walls between the stalls of the restroom.

We were nervous before conversation.

Then, they came and we were perplexed that our teacher told us to talk to them.

However, they were friendly so they talked to us in Japanese.

We understood that pop music and brand shoes are popular among them now.

We learned that they have been to many countries.

We thought this is wonderful!

Through this exchange, we could know the difference between Japan and foreign county.

We had a very good time at Edgren High School!!

😊Thank you😊
