

# Report of a special time

Sakagami Kaho & Kawamura Sae

We went to Edgren High School on January 8th. There were many foods which we have not seen before in Japan. The topics we and the student talked about were the artists who we liked most and club activities. Because

the topics were so familiar, we took a photograph together, thought we could tell the stories of our hobbies, and sang with them. Over

time gradually, our talk became lively and we made friends with Edgren High School students. As for us, it felt like time passed really quickly. Also we wanted to talk with more students. Thought this interchange, we somehow talked with them in English, and that

gave us confidence. However we thought we must be able to speak English more. Thank you for everyone who arranged such an experience☺!!
