

Amazing! ~From Edgren High School~

1135 Nakashima Riko & 1532 Tajima Mitsuki

We went to Misawa and visited *Edgren High School* on January 8th. We talked to *Edgren High School* students a lot. We introduced famous things in Aomori. First, we talked about *miso curry milk butter ramen*. They were surprised that all of them are in it, and said they want to eat it. Second, we showed how to play *kendama*. The students play it like us. It is popular among them. They played it very well. Then, we asked them about their lives. There are many things that we were amazed at. For example, all of them have lived in a lot of countries. The biggest number that the student answered was 6(Singapore, California, etc...). They had lived in these cities for about 4 years each.

They learn foreign languages, but it is different from how we learn it in Japan. We were required to learn only English, but they can choose one out of four. The most popular language was Spanish. They said that Japanese pronunciation was difficult, so there are not many students who learn Japanese. We have entrance examinations before we enter our high school, but the students have exam before they graduate from high school.

👉 This is our lunch! There are many kinds of foods. Our favorite is :Riko/Roast pork, Mitsuki/Cherry Crunch. They are very delicious!

We had a really good time !

We will never forget
