

Finish a visiting of Edgren Senior High School

Class 5 of the first grade

Ohashi Hazuki Niiyama Mizuki

We visited Edgren Senior High School in Misawa on January 8th.

Therefore I found the United States and Japanese difference and common points.

We gathered them up.

<About a meal>

We were able to experience differences between American culture and Japanese culture most clearly. Japanese foods had much food of primary colors such as green, red and blue. The taste was different between the United States and Japan, and taste was dark, and foods such as curry, sour pork and the gyoza which we could eat generally in Japan tasted artificial. In addition, meal charges were low and we were able to buy the pizza in particular at half the price of pizza sold in Japan.

<About the scenery of the Misawa air base>

The buildings in the Misawa Air Base were all similar colors and forms, and an airplane flew in the sky. In addition, as for a traffic sign, Japanese was spoken, and the rules of the traffic were an American. Edgren Senior High School was cozier than a high school of Japan, and pictures were displayed on the wall.

<About the interchange is the students of Edgren Senior Senior High School>

Our partner understood our questions, and they were able to talk using words that we knew. It was difficult to hear fast English of the partner, and a quiet person talked if they were a very cheerful person, so we could feel familiar with foreigners and were glad. We want to talk with foreigners positively from now on.
