2. The difference of cultures between the two

● National characteristics

For example,

roads in America,

It is not important which car is the first.

Unfortunately, all they do next is just driving forcibly, or having quarrels sometimes. There is no kindness. Just the faster is the winner...

On the other hand, roads in Japan,

It is important which car is the first. And there is the spirit of making mutual concessions.

→Because of the difference between the two countries' national characteristics??

● Difference of Laws

In most of the States in the USA,

They can get a [limited] driver's licence when they are over 16.

In Japan, we can get a driver's licence when we are over 18.
